G2 Insurance Services offers a comprehensive set of solutions for every kind of equestrian investment. Our services are tailored to the three distinct types of clients we serve—individual owners, farmers and ranchers, and trainers who run their own business. And our wealth of industry knowledge comes not only from decades of professional involvement, but from years of personal experience and a real passion for horses.

OWNERS

Being confident that their agent is providing competitive options from top carriers is vital to horse owners.

That is why G2 only partners with carriers that are “A” rated: carriers that have a proven track record at resolving claims efficiently and professionally.

So, whether you are involved in a short-term lease, have a question regarding Loss of Use insurance, are purchasing a horse abroad, or need help setting a value on your horse, your agent will respond quickly and with the highest degree of integrity. We pride ourselves on our unique ability to genuinely advocate on behalf of our clients.

FARMERS AND RANCHERS

Farmers and ranchers have unique needs and require customized policies to fully protect their home, property and animals.

G2 is a full service brokerage with access to all the leading markets, so we are able to tailor the right program for your farm or ranch. We provide dedicated claims people who understand your operations and specialize in handling claims quickly and fairly.

TRAINERS

Trainers need to understand the comprehensive nature of the liabilities they can incur doing the highly specialized work of engaging with horses all day long. Often it seems that a basic general liability policy is sufficient and cost effective. But in reality, a basic policy may not actually provide the coverages needed to keep a business operational.

G2 offers a risk management team that evaluates all aspects of what a trainer needs. Our people understand the various situations a trainer will likely encounter, and are experts at determining how insurance companies view the associated risks.

Whether you have been a trainer for decades or are new to the field, G2 can provide assistance and knowledge to determine the coverage you need at a reasonable price.
